COMPREHENSIVE PRODUCT SOLUTIONS

Company Introduction

Based in Guangzhou, LONGWAY has been committed to R&D, production, and sales in the field of cosmetics for 17 years. We have built a 40000-square-meter cosmetic industrial park capable of producing over 100 million bottles of products each year. Our team consists of several professional chemists and owns an organic raw materials synthesis and development center with independent intellectual property rights.

Covering all popular categories, LONGWAY can undertake research and development and production of aerosol cosmetics, sunscreen, OTC, hair care body care, skin care, and hair color products.

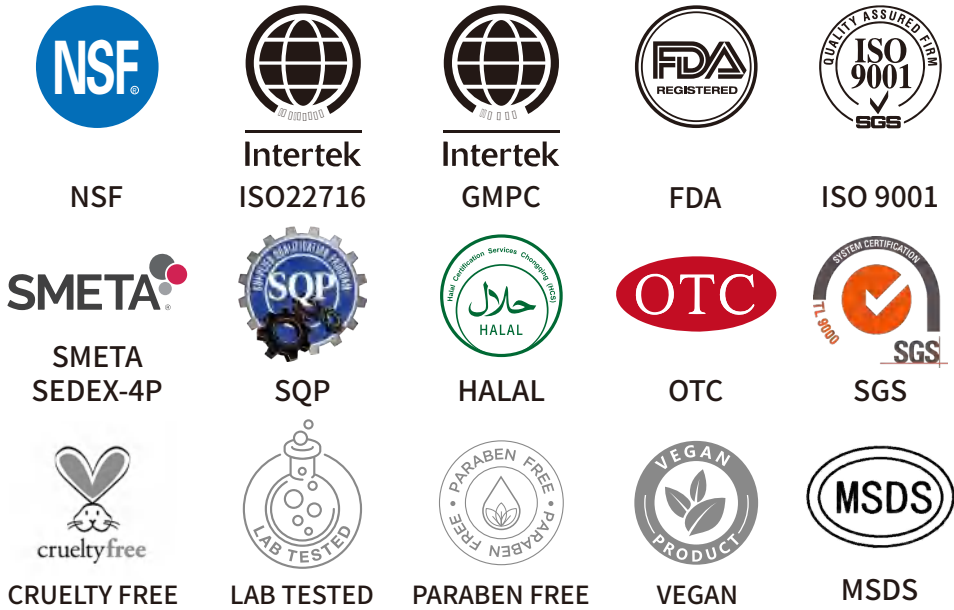

SELF-OWNED SUPPLY CHAIN SYSTEM

LONGWAY has developed its independent supply chain system comprising nearly ten components such as injection molding factor, plastic coating factory, and aerosol packing material factory capable full range of cosmetics products from bottle design, spray nozzle, bottle cap and packaging material to related vacuum coating, spraying, screen printing and foil stamping. Our facilities can easily satisfy various customer needs and different product specifications, reduce OEM/ODM purchasing costs and production costs, and speed up steps like mould creation and product proofing, conducive to shortening the research and development process. We are proud of our industry-leading capability, which has raised efficiency and generated value for many clients around the world. In addition, we have high-quality chemical providers in long-term and stable partnerships, and some of our strategic cooperation partners include the world's top chemical and fragrance firms such as BASF, IFF, Firmenich, and Givaudan.

COMPLY WITH VARIOUS INTERNATIONAL CERTIFICATIONS

RESEARCH AND DEVELOPMENT CAPABILITY

LONGWAY has established several labs, such as Formula R&D lab, Leavening & Plantextracts lab, HPLC&GC lab, SPF value in vivo and waterproof test lab, Bacteria lab, Organic Synthesis lab, Particle size analysis lab, and Sensorytesting lab, which has established the cGMP system and has rich experience and ability to manufacture the OTC drugs compliant with the FDA regulations. With the international first-class doctor research team, which is capable of providing thousands of formulas with basic research data for clients to choose from, and easily meets the specific demands of customers.

PERFECT QUALITY CONTROL SYSTEM

LONGWAY has established a complete product development and testing system, including 29 appearance tests, 14 functional tests, 3 standard trial production processes, and a product traceability system.

PERFECT QUALITY CONTROL SYSTEM

LONGWAY has established a professional product quality check and inspection team and system, including 29 appearance tests, 14 functional tests, 3 standard trial production processes, and a product traceability system.

We had invested in establishing a 40,000 m² cosmetics industrial zone and obtained ISO22716, GMPC, NSF, SQP, HALAL, SMETA-SEDEX 4P certificates. Our company manufactures over 100 million pieces of all kinds of products annually in compliance with international regulations.
